AMENDED IN SENATE MAY 1, 2002

AMENDED IN SENATE APRIL 17, 2002

SENATE BILL

No. 1876

**Introduced by Senator Bowen
(Coauthors: Senators Sher and Speier)**

February 22, 2002

An act to amend Sections 348, 352, 367, 372, and 377 of, to amend and renumber Section 454.1 of, to add Sections 334, 337, 341.5, 367.5, 761.7, and 858 to, to repeal Sections 330, 346, 367.7, 368, 369, 370, 371, 373, 376, 378, and 397 of, to repeal Article 2 (commencing with Section 334), and Article 5 (commencing with Section 359) of Chapter 2.3 of Part 1 of, and to repeal and add Section 350 of, the Public Utilities Code, relating to public utilities.

LEGISLATIVE COUNSEL'S DIGEST

SB 1876, as amended, Bowen. Electrical restructuring.

(1) The existing restructuring of the electrical services industry within the Public Utilities Act provides for the establishment of an Independent System Operator and a Power Exchange as separately incorporated public benefit nonprofit corporations. An Electricity Oversight Board (Oversight Board) is also established to oversee the Independent System Operator and the Power Exchange in order to ensure the success of ~~electric~~ *the electrical* industry restructuring and to ensure a reliable supply of electricity in the transition to a new market structure. The Oversight Board is granted various powers including, but not limited to, requiring the revision of the bylaws of the Independent

System Operator and the approval of the entry of the Independent System Operator into a multistate entity or a regional organization.

This bill would repeal those provisions establishing, and granting powers to, the Oversight Board. The bill would require the Independent System Operator to revise its own bylaws, and would require legislative approval prior to the entry of the Independent System Operator into a multistate entity or a regional organization. Because any violation of the Public Utilities Act is a crime, the bill, by establishing new duties for the Independent System Operator, would impose a state-mandated local program by changing the definition of a crime.

(2) The existing restructuring requires the Public Utilities Commission to establish an effective mechanism that ensures recovery, by electrical corporations, of certain transition costs from their customers, as determined by the commission, including costs for generation related assets and obligations, that were being collected in commission-approved rates on December 20, 1995, that may become uneconomic as a result of a competitive generation market. ~~The restructuring authorizes those costs to be amortized over a reasonable period of time, consistent with not increasing rates for any rate schedule in effect on June 10, 1996, and prohibits, with certain exceptions, the recovery of those costs beyond December 31, 2001.~~ The restructuring provides the calculation mechanism on which these costs are to be based and requires that these costs be limited in the case of utility- owned fossil generation. The restructuring requires the costs to be allocated among various classes of customers, rate schedules, and tariff options and requires that there be a firewall segregating the recovery of the costs of competition transition charge exemptions between certain customers.

This bill would delete the ~~provisions prohibiting the recovery of costs beyond December 31, 2001,~~ the provisions providing for a certain calculation mechanism, the provisions limiting the recovery of costs in the case of utility-owned fossil generation, and the provisions requiring a firewall to segregate the recovery of certain costs.

(3) The existing restructuring requires each electrical corporation to propose a cost recovery plan for the recovery of the uneconomic costs. The restructuring authorizes electrical corporations to apply to the commission for an order determining that the uneconomic costs not be collected from a particular class of customer or category of electricity consumption. The restructuring also authorizes electrical corporations to recover utility generation related plant and regulatory

assets to the extent that they remain unrecovered after December 31, 2001, due to the electrical corporations' ability to recover costs related to the implementation of direct access, the Power Exchange, and the Independent System Operator. The restructuring also requires the commission to authorize new optional rate schedules and tariffs, including new service offerings, that accurately reflect the loads, locations, conditions of service, cost of service, and market opportunities of customer classes and subclasses.

This bill would delete these provisions.

(4) The existing restructuring requires the commission to ensure that public utility generation assets remain dedicated to service for the benefit of California ratepayers.

This bill would recast this provision to require the commission to ensure that utility retained generation remain dedicated to service for the benefit of California ratepayers and would define "utility retained generation" as utility owned generation, qualifying facility contracts, and other bilateral contracts entered into prior to January 17, 2001. The bill would exempt the transfer or sale of generation plants that are located outside the state and are owned exclusively by companies not based in the state from these provisions. The bill would require the commission to establish rates designed to provide the public utility electrical corporation with a reasonable opportunity to recover the reasonable costs of producing power and ancillary service from utility retained generation dedicated to the service of bundled service customers, operating and capital costs, as defined, and a reasonable return of and on the electrical corporation's depreciated book cost of investments in retained generation assets, as defined.

(5) The existing restructuring requires the commission to authorize an electrical corporation that is also a gas corporation and served fewer than four million customers as of December 20, 1995, to implement a rate cap mechanism that reflects price changes in the fuel market under certain circumstances.

This bill would delete these provisions.

(6) Under existing law, the Public Utilities Act, the commission is authorized to supervise and regulate every public utility in the state and to take all actions that are necessary and convenient in the exercise of that power and jurisdiction. The act also establishes the California Consumer Power and Conservation Financing Authority to finance generating facilities and other energy related projects and programs.

This bill would grant the commission jurisdiction over any corporation or holding company, as defined, that owns, controls, operates or manages a public utility, for the limited purpose of monitoring and enforcing any promises, commitments, conditions, or written representations made to the commission or to the ratepayers of the public utility.

This bill would require *that* any gain or loss on sale associated with the sale, transfer, or disposition of assets be allocated exclusively to the ratepayers serviced by the electrical corporation. Since a violation of the act is a crime under existing provisions of law, the bill would impose a state-mandated local program by expanding the definition of a crime.

This bill would establish a Ratepayer Refund Account for each electrical corporation and would require *that* all refunds recovered by an electrical corporation resulting from any litigation or agreement relative to the charging of excessive costs for wholesale power by electric power generators and suppliers that have been recovered, or are recoverable, from ratepayers in commission-approved rates be credited to the electrical corporation’s account and would provide that those funds be held in trust on behalf of the ratepayers.

(7) This bill would declare that its provisions are severable.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Vote: majority. Appropriation: no. Fiscal committee: yes. State-mandated local program: yes.

The people of the State of California do enact as follows:

1 SECTION 1. Section 330 of the Public Utilities Code is
2 repealed.

3 SEC. 2. Article 2 (commencing with Section 334) of Chapter
4 2.3 of Part 1 of the Public Utilities Code is repealed.

5 SEC. 3. Section 334 is added to the Public Utilities Code, to
6 read:

7 334. The Legislature finds and declares that, in order to ensure
8 the success of the electrical industry restructuring in the transition
9 to a new market structure, it is important to ensure a reliable supply

1 of electricity. Reliable electric service is of paramount importance
2 to the safety, health, and comfort of the people of California.
3 Transmission connections among electric utilities allow them to
4 share generation resources and reduce the number of powerplants
5 necessary to maintain a reliable system. The connections among
6 utilities also create exposure to events that can cause widespread
7 and extended transmission and service outages that reach far
8 beyond the originating utility service area. California utilities and
9 those in the western United States voluntarily adhere to reliability
10 standards developed by the Western Systems Coordinating
11 Council. The economic cost of extended electricity outages, such
12 as those that occurred in California and throughout the Western
13 Systems Coordinating Council on July 2, 1996, and August 10,
14 1996, to California's residential, commercial, agricultural, and
15 industrial customers is significant. The proposed restructuring of
16 the electricity industry would transfer responsibility for ensuring
17 short- and long-term reliability away from electric utilities and
18 regulatory bodies to the Independent System Operator and various
19 market-based mechanisms. The Legislature has an interest in
20 ensuring that the change in the locus of responsibility for reliability
21 does not expose California citizens to undue economic risk in
22 connection with system reliability.

23 SEC. 4. Section 337 is added to the Public Utilities Code, to
24 read:

25 337. (a) The Independent System Operator governing board
26 shall be composed of a five-member independent governing board
27 of directors appointed by the Governor and subject to confirmation
28 by the Senate. Any reference in this chapter or in any other
29 provision of law to the Independent System Operator governing
30 board means the independent governing board appointed under
31 this subdivision.

32 (b) A member of the independent governing board appointed
33 under subdivision (a) may not be affiliated with any actual or
34 potential participant in any market administered by the
35 Independent System Operator.

36 (c) (1) All appointments shall be for three-year terms.

37 (2) There is no limit on the number of terms that may be served
38 by any member.

39 (d) The Independent System Operator shall revise its articles of
40 incorporation and bylaws in accordance with this section, and shall

1 make filings with the Federal Energy Regulatory Commission as
2 it determines to be necessary.

3 (e) For the purposes of the initial appointments to the
4 Independent System Operator governing board, as provided in
5 subdivision (a), the Governor shall appoint one member to a
6 one-year term, two members to a two-year term, and two members
7 to a three-year term.

8 SEC. 5. Section 341.5 is added to the Public Utilities Code, to
9 read:

10 341.5. The Independent System Operator bylaws shall
11 contain provisions that identify matters within state jurisdiction.
12 The bylaws shall also contain provisions that state that the
13 approval function of California's bylaws with respect to the
14 matters within state jurisdiction do not preclude the Federal
15 Energy Regulatory Commission from taking any action necessary
16 to address undue discrimination or other violations of the Federal
17 Power Act (16 U.S.C. Sec. 791a et seq.) or to exercise any other
18 commission responsibility under the Federal Power Act. In taking
19 any action, the Federal Energy Regulatory Commission shall give
20 due respect to California's jurisdictional interests in the functions
21 of the Independent System Operator, and shall attempt to
22 accommodate state interests to the extent those interests are not
23 inconsistent with the Federal Energy Regulatory Commission's
24 statutory responsibilities. The bylaws shall state that any future
25 agreement regarding the apportionment of the Independent
26 System Operator board appointment function among participating
27 states associated with the expansion of the Independent System
28 Operator into a multistate entity shall be filed with the Federal
29 Energy Regulatory Commission pursuant to Section 205 of the
30 Federal Power Act (16 U.S.C. Sec. 824d).

31 SEC. 6. Section 346 of the Public Utilities Code is repealed.

32 SEC. 7. Section 348 of the Public Utilities Code is amended
33 to read:

34 348. The Independent System Operator shall adopt
35 inspection, maintenance, repair, and replacement standards for the
36 transmission facilities under its control no later than September 30,
37 1997. The standards, which shall be performance or prescriptive
38 standards, or both, as appropriate, for each substantial type of
39 transmission equipment or facility, shall provide for high quality,
40 safe, and reliable service. In adopting its standards, the

1 Independent System Operator shall consider: cost, local
2 geography and weather, applicable codes, national electric
3 industry practices, sound engineering judgment, and experience.
4 The Independent System Operator shall also adopt standards for
5 reliability, and safety during periods of emergency and disaster.
6 The Independent System Operator shall require each transmission
7 facility owner or operator to report annually on its compliance
8 with the standards. That report shall be made available to the
9 public.

10 SEC. 8. Section 350 of the Public Utilities Code is repealed.

11 SEC. 9. Section 350 is added to the Public Utilities Code, to
12 read:

13 350. (a) It is the intent of the Legislature to provide for the
14 development of regional electricity transmission markets in the
15 western states and to improve the access of consumers served by
16 the Independent System Operator to those markets.

17 (b) The preferred means by which the voluntary evolution
18 described in subdivision (a) should occur is through the adoption
19 of a regional compact or other comparable agreement among
20 cooperating party states, the retail customers of which states would
21 reside within the geographic territories served by the Independent
22 System Operator.

23 (c) The agreement described in subdivision (b) should provide
24 for all of the following:

25 (1) An equitable process for the appointment or confirmation
26 by party states of members of the governing boards of the
27 Independent System Operator.

28 (2) A respecification of the size, structure, representation,
29 eligible membership, nominating procedures, and member terms
30 of service of the governing boards of the Independent System
31 Operator.

32 (3) Mechanisms by which each party state, jointly or
33 separately, can oversee effectively the actions of the Independent
34 System Operator as those actions relate to ensuring electricity
35 system reliability within the party state and to matters that affect
36 electricity sales to the retail customers of the party state or
37 otherwise affect the general welfare of the electricity consumers
38 and the general public of the party state.

39 (4) The adherence by publicly owned and investor-owned
40 utilities located in party states to enforceable standards and

1 protocols to protect the reliability of the interconnected regional
2 transmission and distribution systems.

3 SEC. 10. Section 352 of the Public Utilities Code is amended
4 to read:

5 352. The Independent System Operator may not enter into a
6 multistate entity or a regional organization as authorized in Section
7 350 unless that entry is approved by the Legislature.

8 SEC. 11. Article 5 (commencing with Section 359), of
9 Chapter 2.3 of Part 1 of the Public Utilities Code is repealed.

10 SEC. 12. Section 367 of the Public Utilities Code is amended
11 to read:

12 367. ~~(a)~~—The commission shall identify and determine those
13 costs and categories of costs for generation-related assets and
14 obligations, consisting of generation facilities, generation-related
15 regulatory assets, nuclear settlements, and power purchase
16 contracts, including, but not limited to, restructurings,
17 renegotiations or terminations thereof approved by the
18 commission, that were being collected in commission-approved
19 rates on December 20, 1995, and that may become uneconomic as
20 a result of a competitive generation market, in that these costs may
21 not be recoverable in market prices in a competitive market, and
22 appropriate costs incurred after December 20, 1995, for capital
23 additions to generating facilities existing as of December 20, 1995,
24 that the commission determines are reasonable and should be
25 recovered, provided that these additions are necessary to maintain
26 the facilities through December 31, 2001. These uneconomic costs
27 shall include transition costs as defined in subdivision (f) of
28 Section 840, and shall be recovered from all customers or in the
29 case of fixed transition amounts, from the customers specified in
30 subdivision (a) of Section 841, on a nonbypassable basis.

31 ~~(b)~~—*and shall be amortized over a reasonable time period,*
32 *including collection on an accelerated basis, consistent with not*
33 *increasing rates for any rate schedule, contract, or tariff option*
34 *above the levels in effect on June 10, 1996; provided that, the*
35 *recovery shall not extend beyond December 31, 2001, except as*
36 *follows:*

37 (a) Costs associated with employee-related transition costs as
38 set forth in subdivision (b) of Section 375 shall continue until fully
39 collected; provided, however, that the cost collection shall not
40 extend beyond December 31, 2006.

1 ~~(e)~~

2 (b) Power purchase contract obligations shall continue for the
3 duration of the contract. Costs associated with any buy-out,
4 buy-down, or renegotiation of the contracts shall continue to be
5 collected for the duration of any agreement governing the buy-out,
6 buy-down, or renegotiated contract; provided, however, no power
7 purchase contract shall be extended as a result of the buy-out,
8 buy-down, or renegotiation.

9 ~~(d)~~

10 (c) Nuclear incremental cost incentive plans for the San Onofre
11 nuclear generating station shall continue for the full term as
12 authorized by the commission in Decision 96-01-011 and Decision
13 96-04-059; provided that the recovery shall not extend beyond
14 December 31, 2003. This subdivision shall become inoperative on
15 January 1, 2004.

16 ~~(e)~~

17 (d) Fixed transition amounts, as defined in subdivision (d) of
18 Section 840, may be recovered from the customers specified in
19 subdivision (a) of Section 841 until all rate reduction bonds
20 associated with the fixed transition amounts have been paid in full
21 by the financing entity.

22 SEC. 13. Section 367.5 is added to the Public Utilities Code,
23 to read:

24 367.5. (a) The commission shall establish a Ratepayer
25 Refund Account for each electrical corporation. All refunds
26 recovered by an electrical corporation, either directly or indirectly
27 by way of offset against amounts otherwise owed by the electrical
28 corporation, resulting from any litigation or agreement relative to
29 the charging of excessive costs for wholesale power by electric
30 power generators and suppliers that have been recovered, or are
31 recoverable, from ratepayers in commission-approved rates, shall
32 be credited to the electrical corporation's account.

33 (b) All funds held by an electrical corporation that are required
34 by this section to be credited to the Ratepayer Refund Account of
35 the corporation are property of the ratepayers and shall be held in
36 trust on their behalf.

37 SEC. 14. Section 367.7 of the Public Utilities Code is
38 repealed.

39 SEC. 15. Section 368 of the Public Utilities Code is repealed.

40 SEC. 16. Section 369 of the Public Utilities Code is repealed.

1 SEC. 17. Section 370 of the Public Utilities Code is repealed.

2 SEC. 18. Section 371 of the Public Utilities Code is repealed.

3 SEC. 19. Section 372 of the Public Utilities Code is amended

4 to read:

5 372. (a) It is the policy of the state to encourage and support
6 the development of cogeneration as an efficient, environmentally
7 beneficial, competitive energy resource that will enhance the
8 reliability of local generation supply, and promote local business
9 growth. Subject to the specific conditions provided in this section,
10 the commission shall determine the applicability to customers of
11 uneconomic costs as specified in Sections 367 and 375. Consistent
12 with this state policy, the commission shall provide that these costs
13 shall not apply to any of the following:

14 (1) To load served onsite or under an over-the-fence
15 arrangement by a nonmobile self-cogeneration or cogeneration
16 facility that was operational on or before December 20, 1995, or
17 by increases in the capacity of the facility to the extent that the
18 increased capacity was constructed by an entity holding an
19 ownership interest in or operating the facility and does not exceed
20 120 percent of the installed capacity as of December 20, 1995,
21 provided that prior to June 30, 2000, the costs shall apply to
22 over-the-fence arrangements entered into after December 20,
23 1995, between unaffiliated parties. For the purposes of this
24 subdivision, “affiliated” means any person or entity that directly,
25 or indirectly through one or more intermediaries, controls, is
26 controlled by, or is under common control with another specified
27 entity. “Control” means either of the following:

28 (A) The possession, directly or indirectly, of the power to direct
29 or to cause the direction of the management or policies of a person
30 or entity, whether through an ownership, beneficial, contractual,
31 or equitable interest.

32 (B) Direct or indirect ownership of at least 25 percent of an
33 entity, whether through an ownership, beneficial or equitable
34 interest.

35 (2) To load served by onsite or under an over-the-fence
36 arrangement by a nonmobile self-cogeneration or cogeneration
37 facility for which the customer was committed to construction as
38 of December 20, 1995, provided that the facility was substantially
39 operational on or before January 1, 1998, or by increases in the
40 capacity of the facility to the extent that the increased capacity was

1 constructed by an entity holding an ownership interest in or
2 operating the facility and does not exceed 120 percent of the
3 installed capacity as of January 1, 1998, provided that prior to June
4 30, 2000, the costs shall apply to over-the-fence arrangements
5 entered into after December 20, 1995, between unaffiliated
6 parties.

7 (3) To load served by existing, new, or portable emergency
8 generation equipment used to serve the customer's load
9 requirements during periods when utility service is unavailable,
10 provided the emergency generation is not operated in parallel with
11 the integrated electric grid, except on a momentary parallel basis.

12 (4) After June 30, 2000, to any load served onsite or under an
13 over-the-fence arrangement by any nonmobile self-cogeneration
14 or cogeneration facility.

15 (b) Further, consistent with state policy, with respect to
16 self-cogeneration or cogeneration deferral agreements, the
17 commission shall do the following:

18 (1) Provide that a utility shall execute a final self-cogeneration
19 or cogeneration deferral agreement with any customer that, on or
20 before December 20, 1995, had executed a letter of intent (or
21 similar documentation) to enter into the agreement with the utility,
22 provided that the final agreement shall be consistent with the terms
23 and conditions set forth in the letter of intent and the commission
24 shall review and approve the final agreement.

25 (2) Provide that a customer that holds a self-cogeneration or
26 cogeneration deferral agreement that was in place on or before
27 December 20, 1995, or that was executed pursuant to paragraph (1)
28 in the event the agreement expires, or is terminated, may do any
29 of the following:

30 (A) Continue through December 31, 2001, to receive utility
31 service at the rate and under terms and conditions applicable to the
32 customer under the deferral agreement that, as executed, includes
33 an allocation of uneconomic costs.

34 (B) Engage in a direct transaction for the purchase of electricity
35 and pay uneconomic costs consistent with Sections 367 and 375.

36 (C) Construct a self-cogeneration or cogeneration facility of
37 approximately the same capacity as the facility previously
38 deferred unless otherwise authorized by the commission pursuant
39 to subdivision (c).

1 (3) Provide that the ratemaking treatment for
2 self-cogeneration or cogeneration deferral agreements executed
3 prior to December 20, 1995, or executed pursuant to paragraph (1)
4 shall be consistent with the ratemaking treatment for the contracts
5 approved before January 1, 1995.

6 (c) The commission shall authorize, within 60 days of the
7 receipt of a joint application from the serving utility and one or
8 more interested parties, applicability conditions as follows:

9 (1) The costs identified in Sections 367 and 375 shall not, prior
10 to June 30, 2000, apply to load served onsite by a nonmobile
11 self-cogeneration or cogeneration facility that became operational
12 on or after December 20, 1995.

13 (2) The costs identified in Sections 367 and 375 shall not, prior
14 to June 30, 2000, apply to any load served under over-the-fence
15 arrangements entered into after December 20, 1995, between
16 unaffiliated entities.

17 (d) For the purposes of this subdivision, all onsite or
18 over-the-fence arrangements shall be consistent with Section 218
19 as it existed on December 20, 1995.

20 (e) To facilitate the development of new microcogeneration
21 applications, electrical corporations may apply to the commission
22 for a financing order to finance the transition costs to be recovered
23 from customers employing the applications.

24 (f) To encourage the continued development, installation, and
25 interconnection of clean and efficient self-generation and
26 cogeneration resources, to improve system reliability for
27 consumers by retaining existing generation and encouraging new
28 generation to connect to the electric grid, and to increase
29 self-sufficiency of consumers of electricity through the
30 deployment of self-generation and cogeneration, both of the
31 following shall occur:

32 (1) The commission shall determine if any policy or action
33 undertaken by the Independent System Operator, directly or
34 indirectly, unreasonably discourages the connection of existing
35 self-generation or cogeneration or new self-generation or
36 cogeneration to the grid.

37 (2) If the commission finds that any policy or action of the
38 Independent System Operator unreasonably discourages, the
39 connection of existing self-generation or cogeneration or new
40 self-generation or cogeneration to the grid, the commission shall

1 undertake all necessary efforts to revise, mitigate, or eliminate that
2 policy or action of the Independent System Operator.

3 SEC. 20. Section 373 of the Public Utilities Code is repealed.

4 SEC. 21. Section 376 of the Public Utilities Code is repealed.

5 SEC. 22. Section 377 of the Public Utilities Code is amended
6 to read:

7 377. (a) The commission shall continue to regulate the
8 facilities for the generation of electricity owned by any public
9 utility prior to January 1, 1997, that are subject to commission
10 regulation until the owner of those facilities has applied to the
11 commission to dispose of those facilities and has been authorized
12 by the commission under Section 851 to undertake that disposal.
13 Notwithstanding any other provision of law, no facility for the
14 generation of electricity owned by a public utility may be disposed
15 of prior to January 1, 2006. The commission shall ensure that
16 utility retained generation remain dedicated for the benefit of the
17 public utility's bundled service customers. Nothing in this section
18 may be construed to compel any electrical corporation to renew or
19 renegotiate an expiring contract. For purposes of this section,
20 "utility retained generation" means utility-owned generation,
21 qualifying facility contracts, and other bilateral contracts entered
22 into prior to January 17, 2001. This section does not apply to the
23 transfer or sale of generation plants that are located outside the
24 state and are owned exclusively by companies not based in the
25 state.

26 (b) The commission shall establish rates designed to provide
27 the public utility electrical corporation with a reasonable
28 opportunity to recover the reasonable costs of producing power
29 and ancillary services from utility retained generation assets
30 dedicated to the service of bundled service customers. The rates
31 shall provide a reasonable opportunity for the public utility
32 electrical corporation to recover reasonable operating costs and
33 capital costs, including a reasonable return of and on the public
34 utility electrical corporation's depreciated book cost of
35 investments in utility retained generation assets.

36 (c) "Operating costs" include all customary categories of
37 operating costs, consistent with historical regulatory practices,
38 including any costs charged by the Independent System Operator
39 to the electrical corporation as the generator or scheduling
40 coordinator of the power.

1 (d) “The electrical corporation’s depreciated book cost of
2 investment in utility retained generation assets” shall initially be
3 set at the amounts recorded on its books of account as of December
4 31, 2001, as verified and approved by the commission. The cost
5 of major capital additions and improvements to a public utility’s
6 retained generation assets shall be reviewed and approved by the
7 commission, in the manner set forth in Sections 1005 and 1005.5,
8 in advance of the public utility being allowed to invest in major
9 capital additions or improvements.

10 (e) The commission shall continue to determine the appropriate
11 means for recovery of decommissioning costs.

12 SEC. 23. Section 378 of the Public Utilities Code is repealed.

13 SEC. 24. Section 397 of the Public Utilities Code is repealed.

14 SEC. 25. Section 454.1 of the Public Utilities Code, as added
15 by Section 6 of Chapter 1040 of the Statutes of 2000, is amended
16 and renumbered to read:

17 454.5. (a) Reasonable expenditures by transmission owners
18 that are electrical corporations to plan, design, and engineer
19 reconfiguration, replacement, or expansion of transmission
20 facilities are in the public interest and are deemed prudent if made
21 for the purpose of facilitating competition in electric generation
22 markets, ensuring open access and comparable service, or
23 maintaining or enhancing reliability, whether or not these
24 expenditures are for transmission facilities that become
25 operational.

26 (b) The commission shall facilitate the efforts of the state’s
27 transmission owning electrical corporations to obtain
28 authorization from the Federal Energy Regulatory Commission to
29 recover reasonable expenditures made for the purposes stated in
30 subdivision (a).

31 (c) Nothing in this section alters or affects the recovery of the
32 reasonable costs of other electric facilities in rates pursuant to the
33 commission’s existing ratemaking authority under this code or
34 pursuant to the Federal Power Act (41 Stat. 1063; 16 U.S.C. Secs.
35 791a, et seq.). The commission may periodically review and adjust
36 depreciation schedules and rates authorized for an electric plant
37 that is under the jurisdiction of the commission and owned by
38 electrical corporations and periodically review and adjust
39 depreciation schedules and rates authorized for a gas plant that is

1 under the jurisdiction of the commission and owned by gas
2 corporations, consistent with this code.

3 SEC. 26. Section 761.7 is added to the Public Utilities Code,
4 to read:

5 761.7. Any electrical corporation or holding company, as
6 defined in Section 79b(a)(7)(A) of Title 15 of the United States
7 Code, that owns, controls, operates, or manages a public utility
8 shall be subject to the jurisdiction, control, and regulation of the
9 commission for the limited purpose of monitoring and enforcing
10 any promises, commitments, conditions, or written
11 representations made to the commission or to the ratepayers of the
12 public utility.

13 SEC. 27. Section 858 is added to the Public Utilities Code, to
14 read:

15 858. Any gain or loss on sale associated with the sale, transfer,
16 or disposition of assets that have been included in the rate base of
17 an electrical corporation shall be allocated exclusively to the
18 ratepayers served by the electrical corporation. Gain or loss on sale
19 shall be calculated as the difference between the transfer or sale
20 price and the net depreciated book value of the assets at the time
21 of the transfer.

22 SEC. 28. The provisions of this act are severable. If any
23 provision of this act or its application is held invalid, that invalidity
24 shall not affect other provisions or applications that can be given
25 effect without the invalid provision or application.

26 SEC. 29. No reimbursement is required by this act pursuant
27 to Section 6 of Article XIII B of the California Constitution
28 because the only costs that may be incurred by a local agency or
29 school district will be incurred because this act creates a new crime
30 or infraction, eliminates a crime or infraction, or changes the
31 penalty for a crime or infraction, within the meaning of Section
32 17556 of the Government Code, or changes the definition of a
33 crime within the meaning of Section 6 of Article XIII B of the
34 California Constitution.
